

(b) Amendments to the Claims

A detailed listing of the claims is provided which replaces all earlier versions.

Claims 1.- 4. (Cancelled).

5. (Previously Presented) An organic light-emitting device comprising a pair of electrodes consisting of an anode and a cathode and organic compound-containing layers sandwiched between the pair of electrodes, wherein

(a) at least one layer of the organic compound-containing layers contains at least one compound selected from the group consisting of compounds represented by the following general formula:

wherein

Y₁ and Y₃ can be bonded to Y₂ and Y₄ respectively to form a ring;

Y₁ to Y₄ are the same or different and are each independently a group selected from the group consisting of alkyl, aralkyl, aryl, heterocyclic, amino, silyl, alkylene, aralkylene, alkenylene, imino, -SiH₂-, silylene, carbonyl, ether and thioether, each having no

substituent or a substituent which can include a linking group consisting of arylene or divalent heterocyclic, each having no substituent or a substituent; and

at least one compound selected from the group consisting of compounds represented by the following general formula [6]:

wherein R₁₉ and R₂₀ are the same or different and are hydrogen or a group selected from the group consisting of a alkyl, aralkyl and aryl, each having no substituent or a substituent; any pair of R₁₉ combined to their respective fluorene structures are the same or different to each other; any pair of R₂₀ combined to their respective fluorene structures are the same or different to each other; R₂₁ to R₂₄ are hydrogen, halogen, cyano, a substituted silyl or a group selected from the group consisting of alkyl, aralkyl and alkoxy, each having no substituent or a substituent; and p is an integer from 2 to 10; and

(b) at least one layer of the organic compound-containing layers is a light-emitting layer.

Claims 6. - 19. (Cancelled).

20. (Previously Presented) The organic light-emitting device according to claim 5, at least one of Y₁ and Y₂ is substituted or unsubstituted phenyl; and at least one of Y₃ and Y₄ is substituted or unsubstituted phenyl.
